INNOVO Profitable Net Zero Unveils 75 New Bio-Farm Sites Available for Immediate Investment

[New York, NY, March 5, 2025] – INNOVO Profitable Net Zero has announced the immediate availability of 75 new pre-approved sites for its signature algae bio-farm and data center developments across the United States and Australia. This release represents over \$42 billion in shovel-ready projects backed by INNOVO's proven development model and many eligible for substantial tax incentives.

The newly available sites include 58 locations across 12 U.S. states and 17 sites in three Australian territories, all pre-vetted for regulatory compliance, resource availability, and optimal operational conditions. Each location has been strategically selected to maximize both environmental impact and financial returns through INNOVO's integrated sustainability approach.

"Today's announcement opens unprecedented opportunities for investors seeking both environmental and financial impact," said Martin Kelly, Chair and Founder of INNOVO Profitable Net Zero. "These sites aren't just pieces of land – they're fully conceived developments with permits secured, resource assessments completed, and financing structures established."

The portfolio is designed to appeal to different investor profiles, with projects ranging from \$180 million to \$1.2 billion in total development value. Each site utilizes INNOVO's proprietary integration of algae bio-farming technology with data center operations, enabling carbon-negative digital infrastructure while producing valuable biofuels and agricultural inputs.

Key highlights of the investment opportunities include:

- Scalable development timelines allowing for phased investment approaches
- Pre-negotiated offtake agreements with technology companies for data center capacity
- Established biofuel contracts for algae production outputs
- Many projects qualify for up to 50% in tax credits under current sustainability incentive programs

"What distinguishes these sites is their immediate readiness," added Kelly. "We've eliminated the typical development uncertainties, allowing investors to participate in projects that can break ground within 90 days of commitment."

Detailed information packages for each site are available to qualified investors through INNOVO's secure data room.

About INNOVO

INNOVO is a forward-thinking organization dedicated to providing technological solutions that align with the principles of sustainability and profit. Committed to combating climate change, INNOVO collaborates with companies worldwide to promote environmental responsibility while fostering economic opportunities.
